

Reliability needs two different tests

Preserve a correct answer under benign reordering; update a correct action when a decisive fact changes.

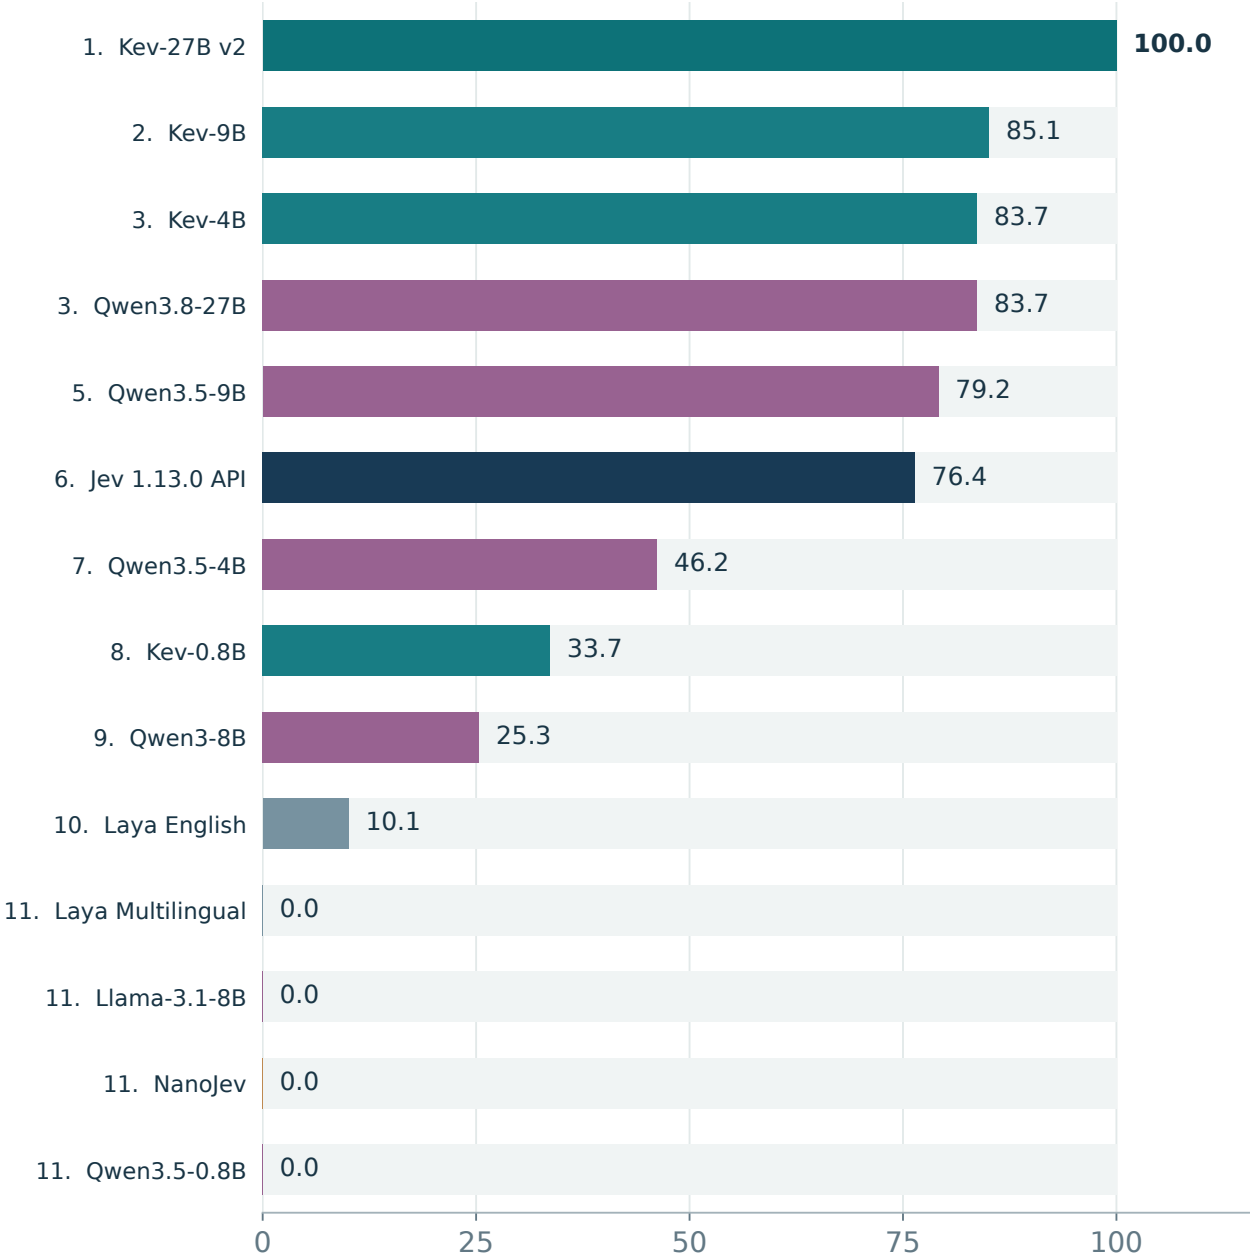

01 Stay correct when form changes

Mean of legal (144) and science (339) joint correctness

02 Switch correctly when facts change

Both actions correct · 288 decisive policy pairs

Reversal scores use all original pairs, including unavailable output as failure; Qwen also remaps displayed answer codes.

The two bars have different populations and references. Read them as independent rankings, never as an added-up score.
