

The lead changes with the domain

Every panel independently ranks the same ten model checkpoints.

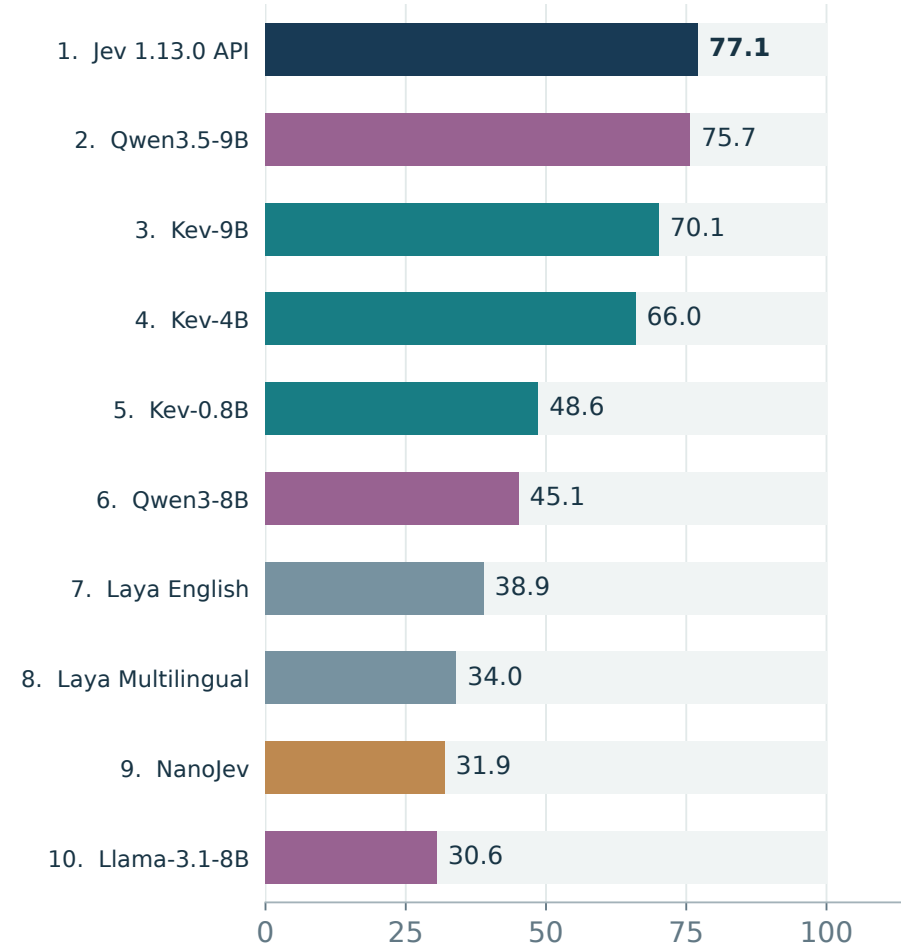

01 Executable policy

288 actions · 96 each rule

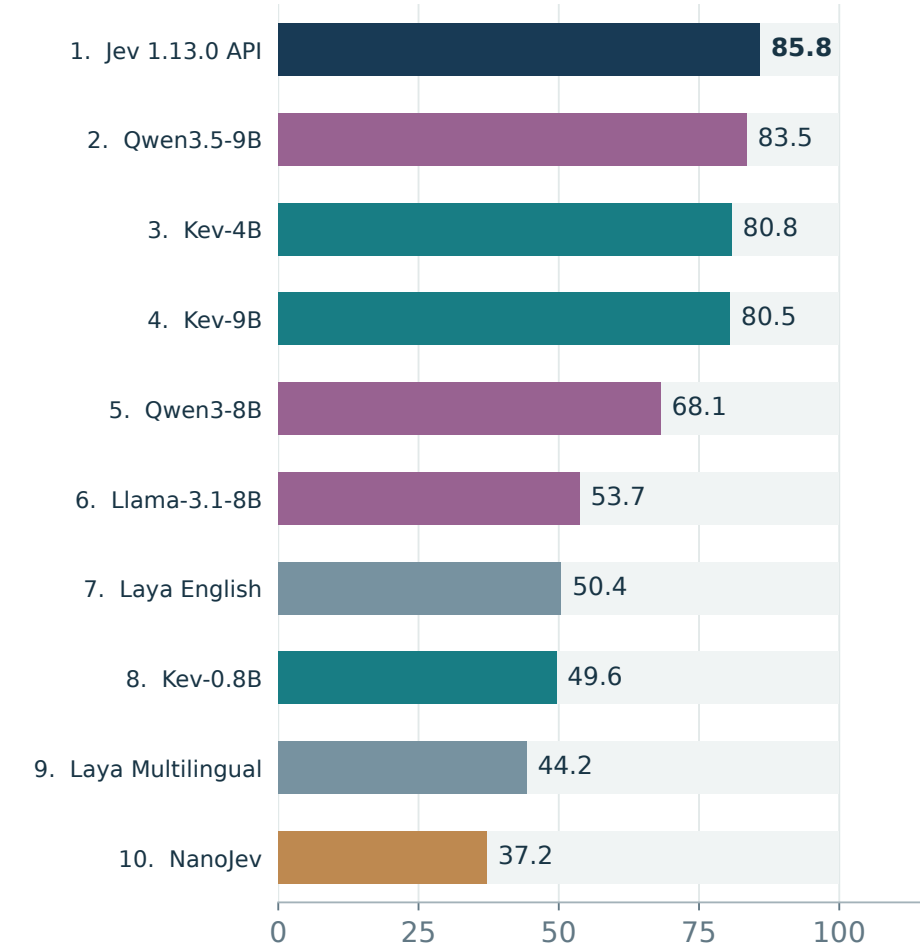

02 Contract inference

144 source annotations

03 Scientific evidence

339 cited claim–abstract pairs

Bars: base correctness / source-label agreement (%). Policy has executable references; legal uses source labels; scientific NOINFO is derived.

Point scores on a fixed reused sample; no shared performance standard for the three reference types.
