

Decision transfer, separated by task.

Fixed 13-model cohort. Original-case accuracy with pointwise 95% source-cluster intervals. Candidate-order robustness is reported separately.

Code: output-choice adaptation, not CRUXEval-O/pass@1. Finance: supplied-span classification. Tools: three gold classes, four candidates; no direct positives.

Focused samples; not Decision Index reproduction or end-to-end agent evaluation. † Training-overlap disclosures accompany the main legal panel.
