

Ten models. One fixed set of decisions.

The summary rank changes when the work receives different weights.

EQUAL DOMAIN WEIGHTS

Three-domain index / 100

Policy index = mean of three action tasks. Overall index = mean of policy, legal and science. Whiskers: pointwise paired 95% cluster intervals.

Same 4,905 matched decisions per model. Source annotations and derived NOINFO differ from executable policy correctness; no deployment claim.
